5 Years p.a	6.62%	8.04%	10.02%	12.51%	15.24%

As at 31 December 2017

Notes on performance

- The above performance is based on back-testing of the Model Portfolios, and does not represent actual performance. The interpretation of the results should take into consideration the limitations inherent in the back-testing, as further disclosed below.
- The performance is the total return after ETF and management fees as at 31 December 2017.
- Our investment portfolios include ETFs with limited performance data. To conduct the back-testing of performance returns, we used the returns of the underlying index, rather than returns of the ETF itself for the following ETFs:
 - BetaShares Floating Rate Bond ETF (QPON)
 - BetaShares Australian Sustainability Leaders ETF (FAIR)
 - BetaShares Global Sustainability Leaders ETF (ETHI)
- Past performance is not an indicator of future performance

The Myrtle Portfolio is one of five model portfolios, you can find more information about our other portfolios here [website](#).
